

It is necessary to change energy sources, gas is the most acceptable, but there is no gas pipeline to Leskovac.

Pellet is also a better option.

90% of households use wood for firewood, while heating plants use fuel oil.

The problem of air pollution in Leskovac

The average age of a car in Leskovac is 17-20 years.

Gases produced by combustion pollute the air.

The biggest causes of this pollution are cars and, during the winter, the use of wood and coal for firewood in private households and fuel oil in heating plants.

About 14,000 cars pass by the main boulevard in the Leskovac city center every day.
