

Sustainable Practices

1. Planting new trees 🌱

Actions of planting new trees in Leskovac and its surroundings represent an important step towards nature conservation and combating climate change. The Kukavica Mountaineering Society often organizes various ecological actions.

2. Landfill cleanup action

Illegal dumping sites are places where waste is disposed of uncontrollably, including plastic, glass, tires and organic waste.

3. Waste sorting ♻️

Waste sorting is a crucial step towards environmental preservation.

In southern Serbia, there is a sanitary landfill located in Zeljkovac, near Leskovac, which collects waste from six municipalities in the Jablanica region.

Eko alarm

The Public Utility Company Komunalac has launched an application for reporting communal issues called Eko Alarm. With the application, citizens will be able to quickly report communal problems.
