

**Dear InPlanet,**

On behalf of **Asociația Hessa**, I would like to extend our heartfelt gratitude for the opportunity to participate in the "GREEN PLAN TO PLANT" (GREPLA-PLA) project. The experience has been profoundly impactful for our youth participants and our organization as a whole.

The GREPLA-PLA project has significantly shifted the perspective of our young participants regarding environmental sustainability and their role in combating climate change. From the outset, the project was meticulously organized, providing a seamless blend of theoretical knowledge and practical application. The various activities, particularly those centered around tree planting and sustainable practices, were instrumental in instilling a deeper understanding of the urgency of environmental issues.

Our participants returned home with a renewed sense of purpose and a strong commitment to making positive changes in their local communities. The hands-on experience of planting trees and engaging in discussions on sustainability empowered them to think critically about their actions and the broader impact on the environment. This project has undoubtedly increased their awareness and motivated them to advocate for more sustainable practices among their peers.

Furthermore, the cultural exchange component of the project played a crucial role in broadening their perspectives. By interacting with peers from different cultural backgrounds, our youth not only learned about diverse approaches to sustainability but also developed a stronger sense of European identity and solidarity. The intercultural nights were a highlight, allowing for a rich exchange of traditions and ideas, further reinforcing the project's goals of unity and environmental awareness.

We are particularly impressed with how the project encouraged participants to think creatively and "out of the box" when it comes to green entrepreneurship and sustainable living. The skills and knowledge they acquired through this project have already begun to manifest in their daily lives, and we are confident that this will have a lasting impact on their future endeavors.

In conclusion, the GREPLA-PLA project has been a resounding success, not only in achieving its objectives but also in leaving a lasting imprint on the minds and hearts of our young participants. Asociația Hessa is proud to have been a part of this initiative, and we look forward to continuing our collaboration on future projects that inspire and empower youth to take action for a better, greener world.

Thank you once again for your leadership and dedication to this cause. We are excited to see the continued impact of GREPLA-PLA in our communities and beyond.

**Warm regards,**

Eddy Hilitanu  
President of  
Asociatia Hessa
