EVALUATION LETTER OF THE ERASMUS + PROJECT "Green Plan to Plant"

First of all, we would like to express our gratitude and pleasure for being offered the opportunity to participate in KA152YOU Erasmus + project with 5 other partners.

As a relatively new organization with modest experience, we really appreciate your belief in our capacities for active participation in Youth Exchange of the project "Green Plan to Plant" in camping Kato Alissos, Patra, Greece from 29th June till 7th July 2024. The exchange provided many opportunities for meeting new people from different countries, learning about their cultures and countries, exchanging ideas and experience and empowering young people to become active citizens in their communities. This is especially important for participants from Leskovac, Serbia, who did not have any similar activities before and did not travel abroad a lot. The experience was a precious one for them and they returned more confident, more eager to take actions, more aware of the importance of environmental sustainability and respect of human rights. It changed their way of thinking and showed the importance of taking individual action. Their evaluation of the youth exchange showed that they felt well accepted and integrated, welcome to address any member of the hosting team and made lasting friendships during their stay in Greece. This raised their awareness of the opportunities Erasmus + programs and other European youth initiatives offer and made them feel more European by gaining important knowledge on the learning, living and working conditions in EU countries.

From the very beginning, the project was well organized and prepared. Before the youth exchange itself, we had several online meetings and implemented the preparation activities in our local communities. Communication was adjusted to young people and the activities of informal and non-formal learning were an interesting and attractive way to turn their attention to serious global problems such as human rights and environmental sustainability. We consider that the goals of the project are fully achieved and we hope our participation contributed to achieve them. Likewise, our dissemination activities will further promote the goals and values of this program.

For us as a NGO, participation in this project is very important as it resulted in developing our network of Erasmus partners and opened new perspectives for participation in some new future international projects.

In Leskovac, 21st August 2024

Radoslav Bikić

President of NGO Training Center Serbia
